Please note that all associated control gear including deep cycle batteries can be provided for the above products.

Please note that to achieve the maximum efficiency from these machines the location is of utmost importance. Our engineers can determine suitability by carrying out a site visit. Planning consent is required before the installation of a wind turbine is permitted. Providing the location does not interfere with your neighbours and you don't live within an environmentally sensitive area such as SSI most local authorities are quite supportive. Before progressing, please make sure there are not any issues by contacting your local authorities planning dept.
